

/home/ferret/CLionProjects
/calenhad/src/module/Procedure.h

```
graph BT; A["/home/ferret/CLionProjects  
/calenhad/src/graph/ComputeService.cpp"] --> B["/home/ferret/CLionProjects  
/calenhad/src/module/Procedure.h"]; C["/home/ferret/CLionProjects  
/calenhad/src/module/Procedure.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: /home/ferret/CLionProjects/calenhad/src/module/Procedure.h. Below it are two white boxes representing source files. The left box is /home/ferret/CLionProjects/calenhad/src/graph/ComputeService.cpp and the right box is /home/ferret/CLionProjects/calenhad/src/module/Procedure.cpp. Blue arrows point from each source file box up to the header file box, indicating that both source files include or depend on the header file.
