

/home/ferret/CLionProjects
/calenhad/src/actions/SnapToGrid
Command.h

```
graph BT; A["/home/ferret/CLionProjects  
/calenhad/src/actions/SnapToGrid  
Command.h"] --> B["/home/ferret/CLionProjects  
/calenhad/src/actions/SnapToGrid  
Command.cpp"]; A --> C["/home/ferret/CLionProjects  
/calenhad/src/nodeedit/Calenhad  
Controller.cpp"];
```

The diagram illustrates a header file dependency. A central gray box at the top represents the header file `Command.h`. Below it, two white boxes represent source files. A blue arrow points from the left source file (`Command.cpp`) to the header file, and another blue arrow points from the right source file (`Controller.cpp`) to the header file, indicating that both source files include the header.
