

matrices::Versor::fromParameters

matrices::Versor::operator*

matrices::Versor::Versor

```
graph LR; A[matrices::Versor::fromParameters] --> C[matrices::Versor::Versor]; B[matrices::Versor::operator*] --> C;
```

The diagram illustrates the relationship between two functions and a class constructor. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'matrices::Versor::fromParameters' and the bottom box contains 'matrices::Versor::operator*'. On the right, there is a gray rectangular box with a black border containing the text 'matrices::Versor::Versor'. Two blue arrows point from the right side of the top white box and the right side of the bottom white box to the left side of the gray box, indicating that both functions are associated with or point to the 'Versor' constructor.
