

calenhad::mapping::
CubicSpline::GetValue

calenhad::mapping::
TerraceCurve::GetValue

calenhad::mapping::
Curve::count

```
graph LR; A["calenhad::mapping::CubicSpline::GetValue"] --> C["calenhad::mapping::Curve::count"]; B["calenhad::mapping::TerraceCurve::GetValue"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, there are two white rectangular boxes. The top box contains the text 'calenhad::mapping::CubicSpline::GetValue' and the bottom box contains 'calenhad::mapping::TerraceCurve::GetValue'. On the right, there is a gray rectangular box containing the text 'calenhad::mapping::Curve::count'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both source functions map to the target function.
