

calenhad::module::Module
::Module

calenhad::module::Module
::showGlobe

calenhad::CalenhadServices
::globe

```
graph LR; A["calenhad::module::Module  
::Module"] --> C["calenhad::CalenhadServices  
::globe"]; B["calenhad::module::Module  
::showGlobe"] --> C;
```

The diagram illustrates a mapping from two source modules to a single target module. On the left, there are two white rectangular boxes. The top box contains the text 'calenhad::module::Module' followed by '::Module' on a new line. The bottom box contains 'calenhad::module::Module' followed by '::showGlobe' on a new line. On the right, there is a gray rectangular box containing 'calenhad::CalenhadServices' followed by '::globe' on a new line. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both source modules reference the same target module.
